ICIP 2002 CALL FOR PAPERS

The International Conference on Image Processing (ICIP), sponsored by the IEEE Signal Processing Society, is the premier forum for the presentation of technological advances and research results in the fields of theoretical, experimental, and applied image and video processing. ICIP-2002, the ninth in the series that has been held annually since 1994, will bring together leading engineers and scientists in image processing from around the world. Research frontiers in fields ranging from traditional image processing applications to evolving multimedia and video technologies are regularly advanced by results first reported in ICIP technical sessions. Topics of interest for submissions include, but are not limited to:

1. **Image/Video Coding and Transmission**: still image and video coding, model-based and synthetic-natural hybrid coding, source/channel coding, stereoscopic and 3-D coding, coding standards, image and video over networks, error resilience, video streaming.

2. **Image/Video Processing and Analysis**: linear and nonlinear filtering and enhancement, restoration, multiframe image restoration, segmentation, wavelets and multiresolution processing, morphological processing, color and multispectral processing, stereoscopic and 3-D processing, modeling, analysis, interpolation and spatial transformations, motion detection and estimation, image sequence processing, noise modeling, architectures and software, neural, adaptive, and fuzzy processing, computer vision.

3. **Image Formation**: acoustic, radar, and tomographic imaging, nuclear, X-ray, and magnetic resonance imaging, geophysical and seismic imaging, radio astronomy and speckle imaging, optical imaging, and synthetic-natural hybrid image systems.

4. **Image Scanning, Printing, Display and Color**: scanning and sampling, quantization and halftoning, color reproduction, image representation and rendering, display and printing systems, image quality assessment.

5. **Image/Video Storage, Retrieval, and Multimedia**: image and video databases, image search and sorting, video indexing and editing, integration of images and video with other media, content-based multimedia, multimedia applications, authentication and watermarking.

6. **Applications**: applications of image processing technology to any field, including biomedical sciences, astronomy, geosciences, environment, humanities, and document processing.

EXHIBITOR’S INVITATION

We cordially invite you to be a part of the International Conference on Image Processing (ICIP) that will be held at the Rochester Riverside Convention Center in the heart of Rochester, New York on September 22-25, 2002. The ICIP conference is one of the major forums for the dissemination of state-of-the-art imaging and video technologies. You will meet with many of your colleagues and experts in the field, who influence and drive this industry. We expect to attract over 1200 professionals to the conference. This would be a good opportunity to present your products to a focused group of professionals as well as to attract them to work with you.

The exhibits are strategically located adjacent to other conference activities to give you optimal exposure to the attendees. In addition to listing your company name and booth location in the Final Program, you will be invited to meet the conference attendees at the opening reception on September 22, 2002. You will also be given 20 invitations/exhibit passes to give to your prospective customers.

You may also elect to become an official ICIP 2002 supporter for as little as $3,000. In addition to the acknowledgements in the conference programs, our web page and on a sign near the entrance of the exhibit hall, you will also be allocated a booth space in the supporter area of the exhibit hall. You can use this space to provide information about your company, your products and to post job openings to recruit people with the expertise you desire to add to your company.
